SWOT ANALYSIS

A SWOT analysis is a useful tool for evaluating the business by zooming in on its strengths, weaknesses, opportunities available, and potential threats. Consider the following:

- **Strengths** – What strengths does the company have now and how will these strengths evolve moving forward?
- **Weaknesses** – What are the deficiencies in the services? Which areas of the business should be improved first?
- **Opportunities** – How can the business leverage partnerships and new innovations to grow the business? Which other segments of the industry would the company consider entering in future?
- **Threats** – Are there external factors (controllable and uncontrollable) that could potentially stifle cash flow or business growth?

➤ MEDICAL WASTE TREATMENT MANAGEMENT

We will provide UAE approved Medical Waste Certification collab with Tadweer approved company's.

ADMINISTRATIVE SERVICES

- **DOCUMENT MANAGEMENT**

A document management system (DMS) is a system used to receive, track, Manage and store documents and reduce paper. Most are capable of keeping a record Of the various versions created and modified by different users (history tracking). In the case of the management of digital documents such systems are based on computer programs. The term has some overlap with the concepts of content management systems. It is often viewed as a component of enterprise content management (ECM) systems and related to digital asset management, document imaging, Workflow systems and records management systems.
